

# BEST PLACES TO WORK IN THE FEDERAL GOVERNMENT® ANALYSIS

## MOST INNOVATIVE AGENCIES

Innovation is the process of improving, adapting or developing a product, system or service to deliver better results and create value for people.<sup>1</sup> For the federal government today, innovation is critical to meeting rising citizen expectations and to finding new, more efficient ways of doing business.

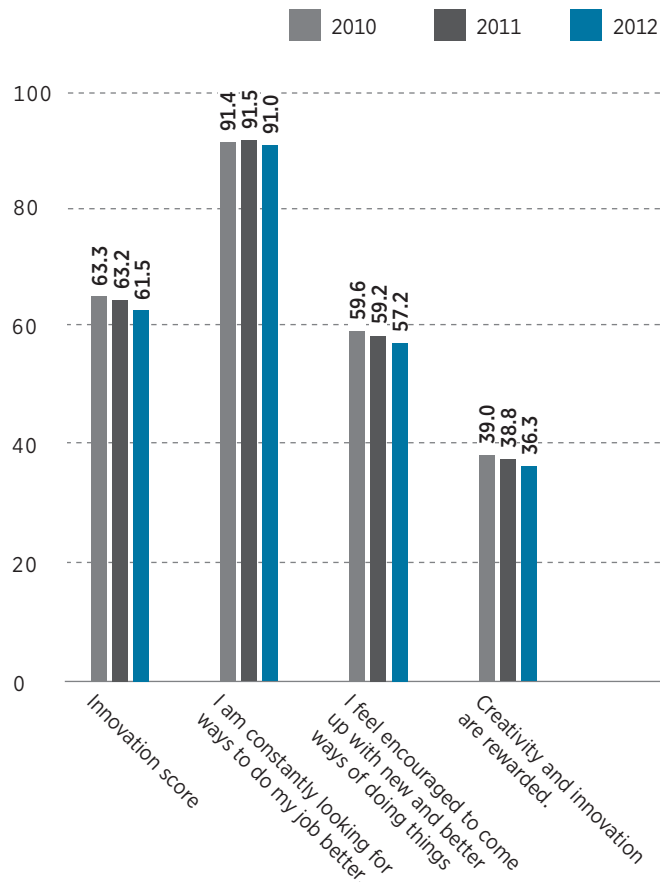

As part of the *Best Places to Work in the Federal Government*® analysis, the Partnership for Public Service and Deloitte examined the Office of Personnel Management’s (OPM) 2012 Federal Employee Viewpoint Survey to see how federal employees feel about innovation at their agencies.

We also looked at what drives innovation in federal agencies and what can leaders do to promote it.

This snapshot, an update of 2010 and 2011 analyses, identifies from the employee perspective which agencies are innovating and which are struggling. The *Best Places to Work* innovation score is based on responses from three survey questions that best reflect employee opinions on innovation. It was developed in concert with The Hay Group, a technical partner.

<sup>1</sup> Partnership for Public Service and IDEO, *Innovation in Government* (Washington, DC: Partnership for Public Service, 2011).

FIGURE 1  
Innovation score and question trends (2010-2012)

## Government Innovation Slipping

From 2011 to 2012, the government-wide innovation score dropped by 1.7 points to 61.5 out of 100. While the vast majority of employees (91 percent) said they are always looking for ways to do their jobs better, a smaller majority (57.2 percent) said they feel encouraged to do so. However, only roughly four out of 10 employees—36.3 percent—said creativity and innovation are rewarded in their agency. The latter two questions slipped by 2.0 and 2.5 points, respectively, since last year’s survey, suggesting that while federal workers remain motivated to improve the ways they do their work, they do not feel supported by their organizations in doing so.

2012 GOVERNMENT-WIDE  
BEST PLACES TO WORK INNOVATION SCORE

# 61.5

1.7 

DECREASE FROM 2011 SCORE

## What Drives Innovation in Government?

To better understand what drives innovation in government, we analyzed survey questions to determine which were most closely related to the three questions that comprise the innovation score. The analysis revealed six survey questions<sup>2</sup> that have a disproportionately high impact on the overall score, ranging from employees feeling rewarded for doing high-quality work, having a chance to expand their skills, having an opportunity to demonstrate leadership, having respect for senior leaders, feeling satisfied with involvement in decisions that impact their work and having a feeling of personal empowerment. Of the six questions, the lowest score involved employees’ belief that they are not sufficiently empowered. Scores in all six areas declined between 2011 and 2012, with the largest decline on feeling rewarded for providing high quality products and services.

<sup>2</sup> Hay Group and the Partnership for Public Service identified Federal Employee Viewpoint Survey questions 1, 43, 61, 63, 31 and 30 as the biggest predictors of the innovation index score.

FIGURE 2  
Percentage of positive responses and trends on questions that drive innovation

## Innovative Agency Rankings

Overall, most agencies experienced a decrease in their innovation scores between 2011 and 2012, though about a third of agencies and subcomponents improved their score. For the third year in a row, NASA was the top-ranked large agency on innovation. NASA's score was almost nine points higher than that of the second-ranked agency, the Department of State. NASA was also one of only two large agencies with an increased innovation score, improving its score by 1.5 points. The Department of Transportation, ranked 16th, had the largest increase over the previous year, improving its innovation score by 1.7 points. The Social Security Administration lost the most ground with a 3.8-point decrease.

Among mid-size agencies, the Federal Trade Commission took top honors on innovation. The Securities and Exchange Commission, ranked 19th, had the largest increase, improving its score by 3.0 points, while the Nuclear Regulatory Commission had the largest decrease, dropping 4.0 points.

For the third year in a row, the Surface Transportation Board (STB) took the top honor for innovation among small agencies. In spite of a 4.7-point drop, the STB still had the highest innovation score of any agency (large, mid-size, small, and subcomponent) in the rankings, while the Office of Management and Budget had the largest increase, with a gain of 6.0 points. The Federal Maritime Commission, the bottom-ranked small agency (27 out of 27), also had the largest decline, dropping 12.7 points.

For the second year in a row, NASA's Stennis Space Center was the top-ranked subcomponent on innovation. Several other NASA centers also ranked among the top five (Johnson, Goddard and Langley). The Department of Agriculture Risk Management Agency (ranked 123 out of 292) had the largest increase (+7.2 points), while the Department of Justice Antitrust Division (ranked 285 out of 292) had the largest decrease (-9.4 points).

*For the full list of rankings, see pages 5 to 15.*

## Private-Sector Comparison

Government fell short against the private sector<sup>3</sup> on the one innovation question for which comparable data is available. Federal employees scored 13 points lower than their private-sector counterparts when asked if they feel encouraged to come up with new and better ways of doing things. Although the government-wide score on this

<sup>3</sup> Data for the Private-Sector Comparison comes from the Office of Personnel Management.

TABLE 1  
Large agency innovation rankings

RANK	AGENCY	INNOVATION SCORE (2012)	% CHANGE (2011-2012)
1	National Aeronautics and Space Administration	76.5	1.5
2	Department of State	67.6	-0.8
3	Environmental Protection Agency	66.1	-0.9
4	Department of the Navy	64.5	-1.1
4	Department of the Air Force	64.5	-0.6
4	Department of Commerce	64.5	-0.6

### Mid-size agency innovation rankings

RANK	AGENCY	INNOVATION SCORE (2012)	% CHANGE (2011-2012)
1	Federal Trade Commission	70.6	-1.5
2	Nuclear Regulatory Commission	69.9	-4.0
3	Federal Deposit Insurance Corporation	67.7	-0.8
4	National Credit Union Administration	67.3	1.9
5	General Services Administration	67.1	-1.4

### Small agency innovation rankings

RANK	AGENCY	INNOVATION SCORE (2012)	% CHANGE (2011-2012)
1	Surface Transportation Board	83.0	-4.7
2	Office of Management and Budget	73.9	6.0
3	Federal Mediation and Conciliation Service	73.6	4.6
4	Peace Corps	73.1	-0.9
5	National Endowment for the Humanities	72.7	-0.6

### Agency subcomponent innovation rankings

RANK	AGENCY	INNOVATION SCORE (2012)	% CHANGE (2011-2012)
1	John C. Stennis Space Center (NASA)	82.6	4.3
2	Lyndon B. Johnson Space Center (NASA)	79.8	1.9
3	Goddard Space Flight Center (NASA)	79.5	1.2
4	Economic Research Service (USDA)	77.6	—
5	Langley Research Center (NASA)	76.5	0.1

question was lower than the private-sector score, several top-ranked federal agencies scored well above the private sector benchmark of 71 percent. More than 80 percent of employees at the STB, Stennis (NASA) and Johnson (NASA) said they feel encouraged to offer new ideas.

## Conclusion

---

Government is slipping on innovation at a time when its ability to be creative is paramount, given the increasing needs for its services and the reduction in available resources. Innovation depends on the total environment that leaders and managers shape for employees. Leaders and managers should take some steps to improve their agency's innovation culture.

**Federal leaders and managers should emphasize the importance of innovation and provide employees with concrete examples of success.**

- Inspire employees by telling a story about how a new idea or process improved the organization's ability to accomplish its mission.
- Involve employees in efforts to improve a business process and solicit employee feedback.

**Organizations must create an open and collaborative culture that allows innovations to take root.**

- Review innovation scores with employees to target solutions.
- Promote open environments to allow for feedback from employees.
- Provide a forum for developing and testing ideas. Give employees an avenue for sharing new ideas in team meetings, brainstorming sessions, or launching an employee competition. If an idea isn't yet ready for implementation, don't shoot it down immediately. Help employees refine the idea.

**Organizations need to offer appropriate incentives to reward innovative approaches.**

- Recognize employees at team meetings or with more formal innovation awards. Recognition sends a positive message to other would-be innovators. Even if an innovation effort was not successful, leaders and managers should spend time examining what went wrong in order to improve the next project.
- Use performance data to evaluate what programs are working well or require additional innovation.

Applying a combination of these approaches together can help drive a culture of innovation, improving federal mission delivery and service to American people.
