DIRECTORS OF DEFENSE AGENCIES  
DIRECTORS OF DOD FIELD ACTIVITIES

SUBJECT: DoD Cloud Update

The DoD Cloud Initiative is part of a much larger effort to modernize the Department's information technology enterprise. The foundation of this effort is rationalizing the number of networks, data centers, and clouds that currently exist in the Department.

Today, there are thousands of networks and data centers and more than 500 cloud efforts across DoD. Many of these networks, data centers, and clouds are supported or provided by the same major industry leaders, but the Department manages them individually. The best practice from industry is to manage these efforts at the enterprise level, rather than the current ad hoc process, in order to enable economies of scale, improve security practices, and maintain the ability to make smarter decisions about our applications and data.

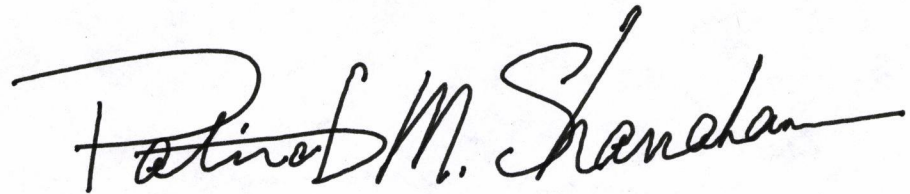

The DoD Chief Information Officer (CIO) is the principal staff assistant and senior advisor to the Secretary and Deputy Secretary of Defense for information technology. With the arrival of Mr. Dana Deasy, my intent is that the CIO will be the lead for the Department's Cloud Initiative, which consists of several efforts and is a crucial part of overall digital modernization.

OSD007907-18/CMD010452-18

## CORRECTED COPY

Accordingly, I direct the DoD Chief Management Officer, in conjunction with the DoD CIO, and in coordination with the DoD General Counsel, to prepare a prompt and orderly transition of authority, direction, and control of the Joint Enterprise Defense Infrastructure Cloud Initiative to the CIO, including transitioning the Cloud Computing Program Office to the Office of the CIO. This transition should take effect at the earliest prudent date. I further direct that all DoD Components afford Mr. Deasy every opportunity to advise on Cloud computing issues. This memorandum shall be implemented consistent with applicable laws.
